PROFESSIONAL SUMMARY

Full-stack web developer with project experience in React, Next.js, Node.js, Express.js, MongoDB, and PostgreSQL. Built applications with REST APIs, authentication, booking workflows, and AI-powered interview feedback, alongside a freelance business website.

EDUCATION

Maharaja Agrasen Institute of Technology (MAIT), Delhi

Guru Gobind Singh Indraprastha University (GGSIPU)

B.Tech in Electronics and Communication Engineering

CGPA: 7.9/10

Nov 2022 -- Jun 2026

CBSE Class XII: 85.4% (2021) | **CBSE Class X:** 91.8% (2019)

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, C++

Frontend: HTML5, CSS3, React.js, Next.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs, JWT, Clerk, bcrypt

Databases: MongoDB, PostgreSQL, Mongoose, Drizzle ORM, Neon

Tools & Integrations: Git, GitHub, Vercel, Postman, Groq API, EmailJS

Fundamentals: Data Structures and Algorithms, OOP, DBMS

PROJECTS

NextHire AI -- AI Mock Interview Platform

Live Demo | GitHub

- Built an interview practice application using Next.js App Router, React, and Tailwind CSS, with interview creation, answer submission, and feedback review.
- Integrated the Groq API to generate role-specific questions and per-answer ratings with improvement feedback.
- Implemented Clerk authentication and user ownership checks for interview retrieval, answer submission, and feedback access.
- Stored interview sessions, answers, and feedback in PostgreSQL using Drizzle ORM and Neon; updated previously saved answers.

Airbnb Clone -- Full-Stack Rental Platform

Live Demo | GitHub

- Built a Next.js and TypeScript frontend with an Express.js REST API and MongoDB for property listings and bookings.
- Implemented registration and login using bcrypt password hashing and JWT authentication, with middleware protecting user and booking routes.
- Added booking checks for required fields, date order, guest limits, and overlapping reservations; calculated total price on the server.
- Modeled users, listings, and bookings with Mongoose references; added user-specific booking retrieval and ownership-checked cancellation.

FREELANCE PROJECT

Ganesh Auto Spare Hubs -- Business Website

Live Demo | GitHub

- Built a responsive product catalog using Next.js, React, and Tailwind CSS, with reusable product cards and category layouts.
- Implemented dynamic routes for product categories, subcategories, and product details using Next.js Pages Router.
- Integrated EmailJS for customer inquiries and used Formik and Yup to validate contact details before submission.
