## PROFESSIONAL SUMMARY

Full-Stack Web Developer with expertise across React.js/Next.js on the frontend and Node.js/Express.js on the backend, with hands-on experience, designing REST APIs, MongoDB schemas, and JWT authentication systems. Delivered production freelance projects end-to-end and built full-stack platforms, featuring secure auth, image upload pipelines, and relational data modeling. Proficient in SSR/SSG, TypeScript, and Git focused on building, performant, secure, and maintainable web applications.

## EDUCATION

**Maharaja Agrasen Institute of Technology (MAIT)**, Guru Gobind Singh Indraprastha University (GGSIU), Delhi

B.Tech in Electronics and Communication Engineering

Nov 2022 – Jun 2026

CGPA: 7.9/10

**CBSE Class XII**, Delhi

2021

CGPA: 8.95/10 (85.4%)

**CBSE Class X**, Delhi

2019

CGPA: 9.66/10 (91.8%)

## TECHNICAL SKILLS

**Programming:** JavaScript (ES6+), TypeScript, C++

**Frontend:** HTML5, CSS3, React.js, Next.js, Tailwind CSS

**Backend:** Node.js, Express.js, REST API Design, JWT Authentication

**Databases:** MongoDB, Mongoose ODM, MySQL

**Web Development:** Responsive Design, SSR/SSG, SEO Optimization, Cross-Browser Compatibility

**Tools & Platforms:** Git, GitHub, Vercel, Postman, Cloudinary

**Computer Science:** Data Structures & Algorithms, OOP, DBMS

**Soft Skills:** Problem-Solving, Communication, Teamwork, Adaptability

**Languages:** English, Hindi

## PROJECTS

### Airbnb Clone – Full-Stack Rental Platform

Live Demo

- Built full-stack rental platform: Next.js App Router + Express.js REST API + MongoDB Atlas
- Designed 10+ endpoints for auth, listings, and bookings with validation and error handling
- JWT authentication with bcrypt hashing and Express middleware for protected routes
- Prevented double bookings via MongoDB date-range overlap queries (*lt/gt*)
- Modelled Users, Listings, Bookings in Mongoose with ObjectId refs and *.populate()*
- Cloudinary image upload with *.env*-based API key security

### Ganesh Auto Spare Hubs – Freelance Project

Live Demo

- Developed a dynamic, SEO-optimized Next.js application with server-side rendering (SSR)
- Built modular UI components using React.js and Tailwind CSS
- Implemented dynamic routing and prefetching using Next.js Link API
- Integrated EmailJS API for real-time customer inquiries without backend

### E-commerce Platform

Live Demo

- Developed a full-stack e-commerce storefront using Next.js, React, and TypeScript
- Implemented App Router for dynamic routing and optimized performance
- Built global state management using React Context API for cart functionality
- Designed responsive UI with Tailwind CSS and added interactive elements
- Integrated features like image optimization and real-time feedback using *react-toastify*

## LEADERSHIP INITIATIVES

- Managed a freelance client project end-to-end including requirements, development delivery.
- Participated in technical club initiatives team-based activities (college-level).
